Dear Dr. Sobhana Alex,

I thank you for submitting the INTERMAGNET application forms for Alibag magnetic observatory. At the recent meetings held here in Ottawa, the INTERMAGNET Operations Committee recommended and the Executive Council approved acceptance of Alibag as a new affiliate INTERMAGNET Magnetic Observatory, with the understanding that Dr. Ole Rasmussen would work with you to resolve some problems identified in your data. The IMO status takes effect when a new IMO has been successfully sending data for two months to one of the INTERMAGNET GINs (in your case, perhaps the GIN will be Golden, Colorado), and on the understanding that the observatory will send its definitive data promptly to INTERMAGNET for inclusion on the annual CD-ROM. The INTERMAGNET Sales Office will soon be sending you a copy of our latest CD-ROM.

On behalf of INTERMAGNET, I congratulate you and your staff, and I welcome Alibag as a new IMO.

Best regards

Yours sincerely

Richard Coles, Chairman  
INTERMAGNET Executive Council
